At the beginning of each networking round, participants will be invited to move themselves into the breakout hosted by one of their preferred funders. If more than 10 people are already in a group, we encourage participants to consider joining a smaller breakout to allow for more participant discussion. We also ask that you refrain from staying in one group for multiple rounds to ensure that other participants also have the opportunity to connect with priority funders.

During each networking round, funders will briefly introduce themselves, their agency's current Arctic research funding interests, & provide time for informal discussion and Q&A.
