

PAN-ARCTIC OUTLOOK • WUWT (acronym for WattsUpWithThat.com)

1. Extent Projection: 5.1 million square kilometers, which is down from 5.5 million square kilometers predicted by WUWT readers in June
 2. Methods/Techniques: web poll of readers
 3. Rationale: Composite of projections by readers, projection bracket with the highest response is the one submitted.
 4. Executive Summary: Website devoted to climate and weather polled its readers for the best estimate of 2011 sea ice extent minimum by choosing bracketed values from a web poll which can be seen at: 15.38% chose 5.0 to 5.1 million km², with with second greatest vote of 11.17% choosing 5.4 to 5.5 million sq km² as the second highest vote.
 5. Estimate of Forecast Skill: none
