

Prinsenbergs, Simon

From what I saw in the Amundsen Gulf and imagery I feel we will have the same extent as last year "as a rebound" but then lose a lot more the following year. And the NW Passage to me will be passable Low ice concentration from now on in as no heavy Arctic pack ice is available at the entrance to M'Clure Strait to fill it after the summer.

Request for 2008 September Sea Ice Outlooks Study of Environmental Arctic Change (SEARCH) and Developing Arctic Modelling and Observing Capabilities for Long-term Environmental Studies
